

Extended Minerals Statement (Cobalt, Mica)

Kraus & Naimer does not use Mica in its products nor its production processes.

As a manufacturer of electromechanical switchgear and switchgear components, we require our suppliers to use conflict-free Cobalt minerals.

Our raw material suppliers have established specific supply chain steps and provide certifications about the origin of the Cobalt used in their production processes and products. Based on the collected data and to the best of our knowledge, we are confident that the Cobalt materials used in our manufacturing originate from conflict-free smelters.

Kraus & Naimer is committed to a conflict-free supply chain. There are no known Conflict Minerals including Cobalt in Kraus & Naimer products that directly or indirectly finance or benefit armed groups in Conflict-Affected and High-Risk Areas.

The Extended Minerals Reporting Template (EMRT) in accordance with OECD Due Diligence Guidance for Responsible Supply Chains of Minerals is available upon request.
