General Information

- Text**
- Use only copper wires with or without tinned/silver-plated individual wires. Soldering the end of the wire before wiring is not allowed.
 - Terminals with factory fitted jumper links are tightened during production for loss prevention. When opening the terminal clamps, make sure that no factory fitted links get lost and that all wire connections are properly seated.
 - After wiring, ALL terminal screws must be tightened to the specified torque values.
 - The protection class of the selected mounting type may vary if optional extras are used.
 - Do not lubricate or treat contacts.
 - Switches may only be mounted, connected and set into operation by qualified persons according to the accepted rules of technology.
 - After installation of the switches the spacings between the terminals must be sufficient to fulfill the requirement of the applicable standards.
