IEC 60947-3

EN 60947-3

IEC 60947-3; EN 60947-3; VDE 0660 Teil107

L401

Type Size: S3

Classification Contact: Rigid contact bridge

Classification Contact Mat: Silver Classification Terminal: Bolt terminal

-40	85	In case of temperatures below -5°C no shock load permissible	
General Information			

Power loss per pole

Text

- Cable lug or copper bus must accept M12x30 screw.
- Terminals with factory fitted jumper links are tightened during production for loss prevention. When opening the terminal clamps, make sure that no factory fitted links get lost and that all wire
- After wiring, ALL terminal screws must be tightened to the specified torque values.
- The protection class of the selected mounting type may vary if optional extras are used.
- Switches may only be mounted, connected and set into operation by qualified persons according to the accepted rules of technology.
- After installation of the switches the spacings between the terminals must be sufficient to fulfill the requirement of the applicable standards.

Operating temperature	
Min. Temperature [°C]	Max. Temperature [°C]
-5	60
