
Push Buttons and Pilot Lights, Ø 22,5 mm

Kraus & Naimer

The development of the Blue Line rotary switch and motor starter product ranges is based on more than hundred years experience by Kraus & Naimer in the design and manufacture of electrical switchgear. Kraus & Naimer pioneered the introduction of the cam operated rotary switch and continues to be recognized as the world leader in that product field.

BLUE LINE

Blue Line products are protected by numerous patents through-out the industrial world. They are built to national and international standards and designed to withstand adverse temperatures and climates.

Blue Line products are accepted and universally recognized for their quality and workmanship. They are supported by a worldwide sales and service organization.

The Kraus & Naimer Registered Trademark

Programs

Push Buttons and Pilot Lights, 22,5 mm Ø

Push buttons and pilot lights by Kraus & Naimer represent an ideal combination of functional security and economical efficiency in a modular design.

Push Buttons

- non-illuminated or illuminated
- flush, extended or with extended front ring
- momentary or latched (for converting into spring return function)

Pilot Lights

- Standard units flush or conical
- Solid pilot lights (direct wire)

Double-Push Buttons

- non-illuminated or illuminated

Emergency Stop Push Buttons

- fool-proof
- non-illuminated or illuminated
- without and with key
- optional mounting in enclosure

Potentiometer

- incl. resistor

Reset Push Buttons

- incl. reset rod

Rotary Switches

- non-illuminated or illuminated
- without and with key
- momentary (for converting into spring return function)

Cam Switches

- ON/OFF switches and double-throw switches
- protection IP 65
- for further cam switches, refer to Catalog 120

Enclosures

- plastic yellow or gray
- with 1, 2, 3, 4 or 6 positions

Legend Options

- front plates and color caps
- legend inserts

Accessories

- a wide range of accessories are available, e.g. protection shrouds and protection caps

Environmentally compatible Materials

- cadmium and asbestos-free
- recyclable

Selection

- complete units
- pre-assembled front elements
- individual components

Front Element

Legend Plate

Fixation Ring

Coupling Plate

Contact Blocks LED Pilot Light Assemblies

Front Elements

- ergonomical design, front rings metallic colored or black
- illuminated elements offer excellent brightest and contrast in all light conditions
- pilot lights with perfect light due to special lenses
- any inscription, abrasion-resistant by laser
- latched push buttons and rotary switches are convertible into spring return function
- mushroom push buttons with large points
- high protection and food resistance: push buttons and pilot lights IP 67/IP 69K, double-push buttons and rotary switches IP 66
- for special operating available with protection caps

Legend Plates

- for front elements and double-push buttons
- with legend inserts
- available with lasered or engraved inscription

Fixation Nut

- is part of the front element
- nut key for fixation nut as accessories

Coupling Plate

- for contact blocks and LED pilot light assemblies
- for max. 3 elements per contact level
- up to 6 contacts on 2 contact levels are possible

Contact Blocks and LED Pilot Light Assemblies

- finger-proof and open terminals (IP 20)
- captive mounting screws
- low overall depth, for mounting in commercial plaster depth box

Contact Blocks

- available as N/C and N/O
- high switching capacity, both in AC-15- and DC-13-operation (technical data see page 22)

LED Pilot Light Assemblies

- in green, red and white color
- long life (100 000 running hours) by especially low power consumption and vibration resistance
- with only 2 voltage ranges the worldwide common applications are covered
- for decoupled function control LED series elements are available

Program Completion

For extensive and complicated switching programs we recommend the use of cam switches size S00 described in Catalog 120. The design and appearance closely match the described push buttons and pilot lights.

Order Information

By changing the order text from P SN to P SB the unit will be specified with black front ring.

Description

Push Buttons and Pilot Lights, 22,5 mm Ø

The modular design of the series push buttons and pilot lights meets your personal requirements in every respect.

Front Elements

Push buttons non-illuminated

Push buttons illuminated

Mushroom push buttons

Rotary switches

Double-push buttons

Emergency stop push buttons

Pilot lights

Solid pilot lights

Contact Blocks and LED Pilot Light Assemblies

Potentiometer

Cam switches

¹For further cam switches, refer to Catalog 120. ²Valid for lines with grounded common neutral termination, overvoltage category III, pollution degree 3.

³If this approval is required, please request when ordering.

The Range of “Blue Line” Switchgear

Technical literature covering the following products is available on request.

	Catalog Number
Main Switches and Main Switches with Emergency Function 16 A-315 A Maintenance Switches 20 A-315 A Switch Disconnectors 20 A-315 A According to IEC 60947-3, EN 60947-3, VDE 0660 part 107, IEC 60204, EN 60204 and VDE 0113	500
CL Switches 10 A-20 A C, CA and CAD Switches 10 A-315 A and L Switches 350 A-2400 A C, CA and CAD switches are designed for universal application. They are recommended for instrument, isolator, double-throw and motor control. L switches are designed for load and off-load applications. They are used to switch resistive or low inductive loads.	100
Optional Extras and Enclosures The complete product line, a large number of optional extras is available, including door interlocks, push-pull devices, cylinder and padlock attachments, control and indicator devices, AC motor drives, as well as enclosures, both insulated and metal.	101
A and AD Switches 6 A-25 A A and AD switches have 4 contacts in each switching stage. These switches provide an extensive range of switch functions and require a minimum mounting depth. Up to 36 switching positions are possible, with availability of 48 contacts per 12 stage switch column.	110
CG, CH and CHR Switches 10 A-25 A Ultra compact CG, CH and CHR switches are ideally suited for control and instrumentation applications. Switch terminals are “finger-proof” and conveniently accessible for wiring and are delivered open. All CG4 switches offer specially designed gold plated contacts or H-bridges with “cross-wire” contact systems, which facilitates their use in electronic circuitry and chemically aggressive environments.	120
DH, DHR, DK and DKR Switches 6 A-16 A DH, DHR, DK and DKR switches incorporate unique corrosion resistant contacts that permit operation on system voltage as low as 1 V. They have fully enclosed and protected contacts which can be operated either by rotary and/or lateral handle movement. D switches are used in calibration and semiconductor circuits. They are also used for relay and contactor control.	130
X Switches 80 A-630 A X switches can be applied for load, tap and gang switching duties. They incorporate 6 contacts in each switching stage. Their compact design provides a minimum length dimension for mounting purposes.	140
KG Switches 20 A-315 A and KH and KHR Switches 16 A-80 A KG, KH and KHR switches are excellent circuit interruptors. They have high through fault and fault making capacities and are especially designed for use as isolators and safety switches for machine tools, distribution panels and switchboards. KG ON/OFF switches offer unusually high dimensioned air and creepage distances between terminals which are designed for time saving “straight-line” wiring. ON/OFF switches are available with up to 8 poles and double-throw switches are available with up to 4 poles.	150
Push Buttons and Pilot Lights, 22,5 mm Ø A complete range of state-of-the-art push buttons and pilot lights represent an ideal combination of functional security and economical efficiency in a modular design.	302
