

Isolator/changeover switch

Kraus & Naimer

BLUE LINE switchgear

since 1907

GRP

Glass
Reinforced
Polyester

IP66 + IK10

A great all-rounder for any industry

What is GRP?

Glass Reinforced Polyester or GRP is a composite of glass fibres in a polyester resin matrix and is a highly versatile material.

Why use GRP?

- Highly resistant to chemical attack.
- Non corrosive.
- Long life.
- Low maintenance.
- High strength & impact resistance, relative to weight.
- Non conductive.
- Fire retardant.
- Not metal (no interest to thieves).

ALL-in-ONE solution

Combine a number of different switches/devices in one enclosure.

- Faster installation.
- Maximum flexibility.
- Professional looking solution.
- Safer installation.
- Cable entries can be facilitated through all walls of the enclosure.
- Cost effective

ALL in ONE Options include:

Kraus & Naimer offer a standard range of rotary isolators in GRP enclosures ranging from 25A to 315A, and from 3 - 6 Pole.

A major benefit of the Kraus & Naimer product range is its availability from stock and the ability to add a variety of different options to the standard isolator.

All products feature:

- IP66 & IK10 protection.
- Red/yellow padlockable handle.
- Optional black handle available.
- GRP enclosure, grey or red.
- Key lockable hinged lid.
- Earth terminal included.
- Lid interlock to prevent opening in 'ON' position.

GRP can remain outside, regardless of rain or shine and remain undamaged and unaffected by the environment.
